This is a communication from the Examiner in charge of this application.  
COMMISSIONER OF PATENTS AND TRADEMARKS

### ADVISORY ACTION

THE REPLY FILED FAILS TO PLACE THIS APPLICATION IN CONDITION FOR ALLOWANCE.  
Therefore, further action by the applicant is required to avoid abandonment of this application. A proper reply to a final rejection under 37 CFR 1.113 may only be: (1) a timely filed amendment which places the application in condition for allowance; (2) a timely filed Notice of Appeal (with appeal fee); or (3) a timely filed Request for Continued Examination (RCE) in compliance with 37 CFR 1.114.

#### PERIOD FOR REPLY [check either a) or b)]

- a)  The period for reply expires 3 months from the mailing date of the final rejection.
- b)  The period for reply expires on: (1) the mailing date of this Advisory action, or (2) the date set forth in the final rejection, whichever is later. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of the final rejection.  
ONLY CHECK THIS BOX WHEN THE FIRST REPLY WAS FILED WITHIN TWO MONTHS OF THE FINAL REJECTION. See MPEP 706.07(f).

Extensions of time may be obtained under 37 CFR 1.136(a). The date on which the petition under 37 CFR 1.136(a) and the appropriate extension fee have been filed is the date for purpose of determining the period of extension and the corresponding amount of the fee. The appropriate extension fee under 37 CFR 1.17(a) is calculated from: (1) the expiration date of the shortened statutory period for reply originally set in the final Office action; or (2) as set forth in (b) above, if checked. Any reply received by the Office later than three months after the mailing date of the final rejection, even if timely filed, may reduce earned patent term adjustment. See 37 CFR 1.704(b).

1.  A Notice of Appeal was filed on \_\_\_\_\_ Appellant's Brief must be filed within the period set forth in 37 CFR 1.192(a), or any extension thereof (37 CFR 1.191(d)), to avoid dismissal of the appeal.
2.  The proposed amendment(s) will not be entered because:
  - (a)  they raise new issues that would require further consideration and/or search (see NOTE below);
  - (b)  they raise the issue of new matter (see NOTE below);
  - (c)  they are not deemed to place the application in better form for appeal by materially reducing or simplifying the issues for appeal; and/or
  - (d)  they present additional claims without canceling a corresponding number of finally rejected claims.
3.  Applicant's reply has overcome the following rejection(s): 35 USC 112 rejection
4.  Newly proposed or amended claim(s) \_\_\_\_\_ would be allowed if submitted in a separate, timely filed amendment canceling the non-allowable claim(s).
5.  The a)  affidavit, b)  exhibit, or c)  request for reconsideration has been considered but does NOT place the application in condition for allowance because: \_\_\_\_\_
6.  The affidavit or exhibit will NOT be considered because it is not directed SOLELY to issues which were newly raised by the Examiner in the final rejection.
7.  For purpose of Appeal, the proposed amendment(s) a)  will not be entered or b)  will be entered and an explanation of how the new or amended claims would be rejected is provided below or appended.

The status of the claim(s) is (or will be) as follows:

Claim(s) allowed: None

Claim(s) objected to: None

Claim(s) rejected: 1-9

Claim(s) withdrawn from consideration: 10-22

8.  The proposed drawing correction filed on \_\_\_\_\_ is a)  approved, or b)  disapproved by the Examiner.

*[Signature]* the attached Information Disclosure Statement(s) (PTO-1449) Paper No(s) \_\_\_\_\_

*[Signature]*  
JULY 11, 2001  
EXAMINER  
100-11671651

Claims in the application are 1-22.

Restriction to one of the following inventions is required under  
35 U.S.C. 121:

- 5       I.    Claims 1-9, drawn to a composition comprising a population of  
oligodeoxynucleotide-containing lipid vesicles, classified in  
class 424, subclass 450.
- 10      II.   Claims 10-22, drawn to a method for preparing  
oligodeoxynucleotide encapsulated in the lumen of interlamellar  
spaces of small multilamellar lipid vesicles, classified in  
class 536, subclass 22.1.

The inventions are distinct, each from the other because:

Inventions I and II are related as process of making and product  
made. The inventions are distinct if either or both of the following can  
be shown: (1) that the process as claimed can be used to make other and  
15 materially different product or (2) that the product as claimed can be  
made by another and materially different process (MPEP § 806.05(f)). In  
the instant case, the product of I can be made by a different process  
such as by the process disclosed in WO 96/40964 (page 3, line 5 of the  
specification) or by the process disclosed in U.S. Patent 6,287,591 that  
20 issued from parent application 09/078,954. Additionally, the product of  
I could be obtained without using a filter as in step (d) of claim 10 of  
II such as by using agitation or homogenization to obtain small vesicles.

Because these inventions are distinct for the reasons given above  
and have acquired a separate status in the art as shown by their  
25 different classification, restriction for examination purposes as  
indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-  
5 elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

10 Any inquiry concerning this communication or earlier communications from the examiner should be directed to David M. Naff whose telephone number is (703) 308-0520. The examiner can normally be reached on Monday-Thursday and every other Friday from about 8:30 AM to about 6:00 PM.

15 If attempts to reach the examiner by telephone are unsuccessful, a message can be left on voice mail.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mike Wityshyn, can be reached at telephone number (703) 308-4743.

20 The fax phone number is (703) 305-3014 or 308-4242.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (703) 308-0196.
